

Water refresher

With the Met office predicting a scorcher of a summer, it's essential that customers keep their hydration levels to a maximum to avoid problems associated with overheating and dehydration.

Ideal for use at home or as part of a travel first aid kit, the Evian Brumisateur Facial Spritz is natural, mineral balanced and PH-neutral. It also has the same purifying properties as Evian Natural Mineral Water, which are achieved during a slow, natural filtration process through the French Alps – a journey that takes at least 15 years.

Used as part of a daily skincare regime on the face or body or to soothe burns and insect stings, the spritz is said to increase skin hydration by 14 per cent. It can also be used to set makeup and is suitable for all skin types – including children's skin.

Rps are £3.50 for 50ml, £6.95 for 150ml, and £8.95 for 300ml.
